Tidal predictions for C.Ro Ports Sutton Bridge have been computed by the Proudman Oceanographic Laboratory, Neither C.Ro Ports Sutton Bridge nor the institute accept liability for the accuracy of the information herein.

Port Facility Regulations

1. C.RO Ports Sutton Bridge operates on a **NAABSA** basis – not always afloat but safely aground, the implication being that vessels must be capable of taking the ground.
2. It is mandatory that every vessel manoeuvring in the turning basin shall use a head line and / or anchor to assist the manoeuvre, as circumstances permit. Masters are required to have crew ready to receive or throw a head line and to ensure that the starboard anchor is ready to drop on a short lead. Boatmen from the Port Facility will be on hand to receive lines.
3. All vessels arriving or sailing from C.RO Ports Sutton Bridge (unless exempt) are required to have a Competent Pilot on board, and to be compliant with The Port of Wisbech Authority Regulations in this regard.
4. Every Pilot acting as such to any vessel using the C.RO Ports Sutton Bridge facility should keep the ships master acquainted with the depth of water alongside the quay, in the turning basin and the River.
5. Every vessel is to provide a safe means of access at all times; a certified and maintained gangway with properly rigged safety net/s, securely fastened and properly lit.
6. A competent, qualified and capable person must be in charge of the vessel at all times.
7. The Master will move the vessel between berths in accordance with any reasonable direction given by the Port Manager and under the direction of a Pilot if necessary. In any event a vessel shall not be brought alongside or taken off the quay without the permission of the Port Manager.
8. C.RO Ports Sutton Bridge operates within the ISPS Code and has a Security Officer on duty 24 hours a day. All vessels and crew must remain compliant with the requirements of the ISPS Code. All security and emergency incidents, including fire, must be reported immediately.
9. Attention is drawn to the UK Rabies Regulations regarding animals and birds on board. Failure to comply may result in severe penalties and the possibility of imprisonment.
10. No person shall bring or cause to be brought into C.RO Ports Sutton Bridge any dangerous or explosive goods without the written permission of the Port Manager. This Regulation shall not apply to any articles that form part of a vessel's equipment.
11. C.RO Ports Sutton Bridge has declared to DEFRA that no catering waste from any means of transport operating internationally is authorised to be landed for disposal. For the purpose of this declaration, 'international' refers to outside EEC, Norway and Finland. Masters of vessels authorised to dispose of waste are reminded that MGN 387 (M+F) requires ships' Masters to notify ports / terminals in advance of their vessels' arrival of waste on board, by means of the Port Waste Management Notification Form. Therefore, notification must be made to C.RO Ports Sutton Bridge Agencies Ltd prior to vessels arrival, in order for it to be agreed and organised.
12. C.RO Ports Sutton Bridge operates a "No Smoking" policy. Smoking is not permitted in any Warehouses, Buildings, Quay Areas, Ship's Decks and Holds and other areas as directed by the Port Manager.
13. C.RO Ports Sutton Bridge reserves the right to refuse entry to any visitors or contractors to vessels at any time. Pre-notification of any expected deliveries and visitors is required, in particular if the vessel is expecting to load bunkers. All visitors, contractors, delivery companies etc. are to obey the instructions of the Port Manager with regard to parking of vehicles on site. All visitors and contractors must comply with all Port Policies with regard to Health & Safety, and Security as directed by the Port Manager. The parking or storage of vehicles, ships stores or cargo is strictly prohibited within 2m of any fire hydrant or other fire fighting appliances.
14. During the hours of darkness vessels alongside C.RO Ports Sutton Bridge should ensure that deck floodlights are kept on to ensure the safety of crew and Port Employees; but are reminded that to avoid difficulties to passing vessels, deck floodlights should not be trained onto the navigation channel.
15. **Every vessel alongside C.RO Ports Sutton Bridge must be properly secured and moorings tended at all times**, for which the Master is responsible. Masters and Owners of vessels are reminded of the extreme rates of tide and current that occurs in the River Nene. Mooring lines are to be secured to fixed bollards and not just to winch drums and head and stern ropes should consist of two ropes (each) and be secured in such a way that they can be individually tended at all times.
16. The Port of Wisbech Byelaws 1957 and the Port of Wisbech Port Marine Safety Code take precedence over these regulations in the event of conflict.
17. The Port Manager is the person appointed by C.RO Ports Sutton Bridge Ltd and the term includes any other employees acting under his authority
18. All towage is undertaken subject to London Towage Standard Conditions for Towing and Other Services.
